DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Esther Chong, Reg. No. 40,953, on 26 March 2004.

The application has been amended as follows:

In the claims:

In claim 1, last two lines: "each of the first slanted slopes and each of the second slanted slopes" has been replaced with --each of the first slanted slopes and respective each of the second slanted slopes--.

In claim 16, last two lines: "each of the first slanted slopes and each of the second slanted slopes" has been replaced with --each of the first slanted slopes and respective each of the second slanted slopes--.

End of examiner's amendment.

Allowable Subject Matter

2. Claims 1-20 are allowed.
3. The following is an examiner's statement of reasons for allowance:

The prior art does not disclose the device of claims 1 or 16, in particular the limitation that there are first slanted slopes at corners where the common electrodes meet the common line in upper portions of one of the even- or odd-numbered sub-pixel regions, second slanted slopes at corners where the pixel electrodes meet the first pixel connecting line in upper portions of one of the even- or odd-numbered sub-pixel regions, and each of the first slanted slopes and respective each of the second slanted slopes cross each other. Claims 1 and 16 are therefore allowed, as are their dependent claims 2-15 and 17-20. The closest prior art is discussed below.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

U.S. Patent No. 6,657,694 to *Ko et al.* is the patent resulting from the parent of this application.

U.S. Patent No. 6,618,109 to *Hidehira et al.* discloses [see Fig. 3] an analogous LCD with crossing first and second slanted slopes near the recited corners; however, these slanted slopes are not at the corners where the common electrodes meet the common line or the pixel electrode meets the first pixel connecting line (in each case, the relevant electrodes meet at right angles, rather than with a slanted slope).

U.S. Patent No. 5,905,556 to *Suzuki et al.* disclose [see Fig. 20, for instance] slanted slopes at the relevant corners, but not the first and respective second slanted slopes crossing each other.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Andrew Schechter whose telephone number is (571) 272-2302. The examiner can normally be reached on Monday - Friday, 9:00 - 5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert H. Kim can be reached on (571) 272-2293. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
